ABSTRACT

Quality of lecturers is one of most influential factors for a quality of education program in an university. That mean not only grade of study that have been through or many researches that been held by them. But, another important thing is about displicines of lecturers on holding education program which is duty of him on some semester. Thus, it is needed to build a system that can monitor those problems.

Since the beginning of STT Telkom until now, there is no a standard system which is really doing monitoring of STT Telkom education activities.

Because of those reasons, this Final project will be made , which is an application of Educational Monitoring System will be build and will process the data from BAP to be meaningful information. This system also expected to count the credit point of lecturer's activities automatically base on the data input.

This Final project use based on web technology, with PHP as a programming language and MySQL as a database server so that it is easy to be implemented and to be understood by user.

Keyword: Educational Monitoring System, BAP, Credit Point, PHP, MySQL
