

## **ABSTRACT**

Vehicle malfunctions and traffic accident in the toll road always happen almost every day, and it loses lot of casualties in each year. Vehicle malfunctions factor is one of the sources of traffic accident. Based on the data, machine damage, flat tire, break failure, and mechanical malfunction are often the causes of traffic accident. These factors often happen because of the driver's lack of awareness about the importance of checking the vehicle first before traveling. Therefore, the researcher has an idea to create an informational book which allows the driver to comprehend how to do the vehicle examination properly. In this book, there are several steps that should have been done by the driver in order to have a safe and sound trip.

This development of informational book explains the ways and steps of doing vehicle examination using an attractive visual to deliver the information effectively. Hopefully, drivers could apply all of the steps in the book, because the driver's and passenger's safety is the main thing of safety driving in toll road.

**Keywords:** traffic accident, toll road, information, vehicle examination.
