

ABSTRACT

The final task is motivated by a phenomena that occurs in government buildings which do not implement the cultural identity of the area in the building . Because the central government is a container of activity in carrying out community service tasks , as well as acting as a symbol of philosophy , functional , monumental , and has the function of openness that becomes a reflection of the city. Based on the West Sumatra Provincial Regulation No. 6 of 2011 Concerning Architecture Building buildings and Local Wisdom contained in Article 12, paragraph 2 , explaining that modern buildings by District / City is considered important and should be planning by utilizing the strategic elements of the traditional decorative ornaments . This will be the basis of reference in the design of back office Pariaman City Hall by conducting comparative studies and analysis of the problems found in the field.

This thesis aims to elevate the values of local wisdom Tower House in Pariaman City Hall interior applications , by implementing elements of culture that refers to the standard rules of local government Pariaman . The method used to collect data through the survey , observation, and literature data . Then analyzed connect with the theoretical resulting design alternatives concluded through comparative studies . Through the results of this thesis it is expected that government buildings in particular could Pariaman implement richness characteristic of Minangkabau culture in interior design office. And as one way to raise the significance and foster a sense of belonging to a local cultural values .
