The interior design lammar's Family SPA & Reflexology with Luxury Styling Concept

Background: This project aims to realize the "New Look" at The Lammar's Family Spa & Reflexology by displaying the luxury side corresponding to the image of the Company, it is also applied by taking into the family visitors. Based on observations on interior ambience The Lammar's SPA have some circulation problems, completely facilities, support space, and a style of design.

Objective: Designing interior family SPA for the family to be a place that can increase family togetherness, making the circulation space that fits the needs of space and comfort standards, adding support facilities for children, a bar area and a reading area so that visitors are not saturated.

Method: Do the survey ranging from collecting data that is how many visitors during the day, especially families who come to The Lammar's mainly that come with his family.

Results: In an average week family visitors who comes with kids relatively few and less than 6 families. Therefore the Lammar's designed to have a special therapy room and a family atmosphere that is shown is designed to better support the child's character.

Conclusion: So the expect of implementation support space such as a room of family therapy in accordance with the science of ergonomics, complementary visitor facilities associated with the family and the public to support an atmosphere of togetherness between children and parents in the SPA.
