

ABSTRACT

Telkom University Sports Center is a gymnasium as a sports center at the University of Telkom. Telkom University has many Student Activity Units (UKM) sports such as soccer, basketball, badminton, volleyball, and much more. However, Telkom University does not have a gymnasium. As a result, many sports clubs Telkom University practice their sport in privately owned grounds off campus. In addition societies' activities today are very diverse and are too busy to exercise, even though exercise is important for maintaining a healthy body. Therefore Telkom University's Sports Center also will be designed, in addition to facilitating sportsmen, to attract people who rarely exercise, and want to exercise at Telkom University's sports center. The interior design concept for this sport center is "Sport Recreation Center" which means designing a sports center to be attractive as a place of recreation where the objective is, in addition to facilitating the sportsman, to attract people who have spare time and are less likely to be interested in sports because sports interior design and sports center facilities which is interesting not as a sports center in general. The theme used is "Lighting For Design" which means the lighting is made to solve the problem and also provide aesthetic value to the indoor sport center. Apart from that, innovations in lighting design is a technological innovation leading to a future in which the design of artificial lighting and natural lighting will play a trend and it is required in designing.
