

ABSTRACT

Islamic boarding school is one of islamic educational institutions that teach about islam with the guidelines Quran and Sunnah Rasul and can be relied upon in everyday life. One of the identical problem on islamic boarding school is about environmental hygiene and class cleanliness. That almost the side of rural were not clean. However, the interior problem is the lack of learning facilities and furniture plan still crowded. It make the room looks like cramped and darker just because sun access is covered by furniture. So islamic nuances in a room is not reflected. This design plan aims to setting an educational forum that can designing learning facilities and the room with safety and comfort standards. Design method used by the author is observation, interviews, documentation and literature. In this case the authors designed a boarding school that accordance with the phenomenon in public reality, knowing what the teacher and student desired about education and boarding school needed the author can make some of sketches in a design concept. The data obtained will be assessed through a SWOT analysis to find solutions to existing problems in concept, site plan, layout, flooring, ceiling, 3D and mockups.
