

## ABSTRACT

*Library* of educational institutions is one source of information, knowledge and *education*. The *library* has a very big role against the passage of learning activities that aims to help educate young people through science Indonesia. The development *library educational* institutions in general can be seen from some school libraries are not maintained, the design of the interior is less interesting, it is not uncommon these libraries occupy the remaining space and looks like a warehouse containing books without activity, the *library Boarding school Al Hikmah 2 Benda* is wrong the means provided the foundation to meet the needs of students in learning, but the *library* is supposed to be a necessary and often visited by students to find literature, but in fact the students are reluctant to visit the *library*, this could be the interior of the *library* which is less attractive due to occupy the building sport is converted as libraries ,. Therefore, one way to achieve the objectives of their boarding school *library* is to create a special building for the *library* boarding school Al Hikmah 2 so that the interior of the *library* becomes more interesting and can change students' views on the *library* is a boring place.
