Abstract

Indonesia is an archipelago country, therefore made Indonesia has a rich culture very much and also diverse. The culture is one of the characters. Literacy is a system of visual symbols marked on paper or other media like stone, wood, and fabric, to reveal the expressive elements in a language. Another term to refer to the script is writing system. Every region in Indonesia has its own script, one of which contained the script Sunda region of West Java. But for now learning about the Sundanese script needs to be improved further , with the aim of providing a deeper insight about the characters Sunda .

Therefore made an application form called AKASA Game Smartphone based on android operating system on the street . This game is designed to introduce characters sunda but made in the form of games . So hopefully the kids can play while learning .

KeyWords :Aksara, Android, Smartphone, Game
