

ABSTRACT

Special School and Inclusion School in some Indonesia territory is far from standard of special education for disabled children. In addition, the conditions of Special Education graduate students has not received a job that matches their skills.

While the industry has not fully convinced of the competence of graduates of special education students, this is due to lack of socialization curriculum of Special Education (PLB) of the Department of Education. So that this condition makes the students graduated from special education has not been fully believed by the industry to work with.

This final project entitled "Sahabat Sekolah Indonesia" has the ability to bridge the information held by the School of Special Education with industry. Expectations of unity and understanding information in perspective between the Industrial and School of Special Education to increase employment for graduate special education students, special education graduate students so that later get a decent job and are able to improve their lives in a dignified and independent.

In order to provide information broadly Special Education and can be accessed by anyone, anywhere, then this final project is made based website, which is hosted on the internet. That way the information displayed is the information up to date.

Final Application Project was created with the aim to improve the quality of life for special education graduates in particular and improve the quality of education special education in general. In order to achieve these two objectives, then the application is also made several fungsionalitas supporters, including functionality for the Dept. of Education Provincial Schools as supervisor of special schools and inclusion in their respective provinces. The involvement of the Department of Education is very important, because the agency can determine the condition of the School of Special Education and know the industry response to the special education graduate, made a decision expected by Provincial Education Department of Special Education at provinis they will adjust to the conditions of the industry in the province. So it will form a real educational system and benefit the special education graduates.
