

## ABSTRACT

---

Hemodialysis Clinic is a clinic that provides dialysis services to patients with renal impairment. All patients undergoing treatment at the clinic should have a record of medical history that has been done in this hemodialysis clinic or what we often refer to as Medical record patient. Patients on hemodialysis should be noted all the activities during treatment, such as the provision of medicines, as well as other data needed clinic to serve the patient's medical record data such as blood pressure, blood flow velocity, and so on. Under these conditions, made the application service web-based hemodialysis patient clinic in west jakarta raycare center in order to facilitate the patients and the clinics in performing hemodialysis
