

ABSTRACT

Surabaya is a city of Hero which is a lot of history which is closely related to the Indonesian nation. Therefore, there are still many heritage buildings, especially colonial dutch relics that still stand firmly until today. Therefore it is unfortunate that historic buildings will be useless if not used properly. Teens Surabaya not understand with the history of the building in Surabaya because not mani meia that provide information about historic buildings. Based on the Regional Regulation of Surabaya City Number 5 of 2005, which contains the preservation of the building and or cultural heritage environment, it is necessary to have a media that specifically contains the buildings of heritage and cultural heritage in Surabaya. It is expected that the younger generation of Surabaya City does not forget and more appreciate the history of the city through the city's historical assets before all its historical assets are evicted and replaced with new buildings. Therefore it is necessary An alternative media information to provide insight and facilitate the people of Surabaya City, especially the teenagers to get information about historical buildings, alternative media information presents information about the history of the story of the building, the location of the building until access to the building. Data collection method used in this final writing is to use qualitative methods the authors look for data through the method of observation on the object of research, literature, interviews related sources, and analysis used is SWOT and matrix analysis. So obtained a mobile application media that contains complete information about the historic building.

Keywords: *Media Information, Historic Building, Building Heritage of the Dutch era in the city of Surabaya. Surabaya.*
