

Abstract

Indonesia has a number of abandoned children who are always soaring at all times as well as social service facilities such as orphanages. But in the belief, the rapid development of orphanage is not in line with the provision of orphanage facilities in accordance with development standards and there is no function orphanage that can make a place of developmental development of children. The orphanage children themselves are passive, aloof, unable to stabilize their emotions and have great anxiety, because the function of the orphanage plays a major role in the growth and character of the child. Many aspects that can improve the function of orphanage, one of which is in the field of interior design. The application of the interior design field can help for the delivery of comfort in children, child psychology while in the room and also can help the child's growth and development process is safe in the orphanage. Therefore, an orphanage design that has a minimum standard of eligibility to be able to provide the children of an institution in accordance with the function and purpose of the orphanage should be. As well as the design of this orphanage was doing a review of the orphanage in terms of spatial planning, ergonomics, activities undertaken and what facilities are needed to improve growth and children who are in orphanages.

This translates to a design that will create an orphanage that can make orphaned children feel happy and comfortable with the needs of children whose facilities for children and also support facilities for child development.
