

Abstract

In Textile Craft and Fashion coverage, both have the same portion on its' application so in textile craft area especially can be made as a topic study and need attentions. Because of that, as a student of Textile Craft and Fashion, we hope in organizing Textile Craft study become the attention, making it as research and maximazing skills in Textile Craft environment to produce experiments which have Craftmanship and aesthetics values. Planning this work will be realised in clothing and textile sheet by exploring various advance technique like adding additional applications, fusing Textile Design surface tehcnique and Textile Structure with development from both tehnique to create an image and concept. The design concept itself is inspired by nature with Normal Nature Nomade which is presenting the condition of society nowadays especially woman who are facing daily routine with tropical colour like green, yellow and chocolate with fresh and nature sensation. This research can answer the urgencies and able to dig deep in study of Textile Craft environment which is part of Textile Craft and Fashion program.
