

Abstract

One important element in the structure of Islamic society is the mosque. Mosque or mosque is a house of worship of Muslims. Duties takmir mosque such as muadzin, imam prayer and ta'lim readers. The duties of mosques conducted by pilgrims and ta'mir who run activities within the mosque sometimes forget with the task given to become ta'mir at the mosque. One of the contributing factors is the limited information or warning when the congregation is given the task of becoming a muezzin, a prayer imam, and a ta'lim reader when the time has come, then there is the possibility of the person forgetting or not knowing. In solving the above problems, then we create an application that can facilitate mosque worshipers know the duty as muadzin, prayer imams and ta'lim readers in place of the mosque. The Mosque Task is one of the mobile apps to help remind mosque worshipers of muezzins, prayers, and ta'lim readers. With some additional features such as being able to view the entire task schedule at the mosque. In this way the Jemaah will be easier to know the time schedule assigned.
