

ABSTRACT

Pre-school education in early childhood is a necessity for children from birth to six years of age. Because at that time the child is in golden age, so it is easier to absorb knowledge and active in moving and explore to find out new things. For that, children at an early age requires full education parents or companion substitute such as daycare and preschool in accompanying the development of child development.

Bandung is the City of Education for Inclusive, so Early childhood with girded by anyone is no exception for Children with Special Needs. Inclusive school demanding design that can be balanced between the demand for psychic children with special needs and without. Especially in the area class so the child can be focus for following activities. Through the method of analysis, surveys and interview so the interior design of Daycare and Preschool with an atmosphere of fun and Relaxing can give the impression of a cheerful but still comfortable.
