

ABSTRACT

The school is a building or institution for learning and teaching as well as a place to receive and give lessons. Schools also has a meaning as a place to carry out the education. The purpose of education is to develop the potential of students to be better. But now there are some schools ignoring the comfort, so isn't optimal to achieving that goal. SMP ITABA in Sidoarjo is one of them. The problem is about air. The other problem is about not enough of building area will affect the amount of space. And the impact on the process of teaching and learning. So there is a space that has a double function. And some space is not used according to their functions because doesn't have enough of furniture. Based on the problems identification that have been described, it will be designed the room that can meet all the activities and accordance with the function. The design is expected to provide the convenience of students and other users in SMP ITABA for doing all activities.
