

ABSTRACT

DKM (Council of Mosque Prosperity) AL-Kautsar are the ones who are in charge of maintaining the prosperity of the mosque, the mosque's physicality as well as the activities or activities of worship in it. There are many Operational Activities in the Mosque such as Zakat Activities, Infaq, Shodaqoh, Qurban, etc. Such Operational Activities in the Masjid In General will make the Cash situation change, either experiencing Cash Increase or Cash Reduction / Disbursement. With this Cash Management Application (Case Study: DKM AL-Kautsar, Bandung) is expected, can Help DKM AL-Kautsar in Running Operational Activities in the Mosque. This Cash Management Application can be used to perform Recording as well as Calculation of Cash Receipts, Such as Zakat Payment, Charity Box Receipt, Infaq Receipt, Qurban, etc. but also can perform Recording and Calculation of Cash Expenditures, Such as Operational Expenses Mosque, and Operational Expenditures Activities Qurban. This Cash Management Application is built Using the CodeIgniter Programming Language and Using MySql As the database.

Keywords: Cash Management Application, DKM, Operation Activity, Codeigniter, MySQL
