The use of Islamic prayer equipment, especially the children prayer equipment today is very various. Seeing Indonesia as a country with a majority of the population of Islamic religion that makes the producers of prayer equipment continue to develop from a variety of design equipment of prayer, in order to attract children's attention to prayer feels more fun. The design of children's prayer equipment with hijaiyah letters inspiration is a development of children's prayer equipment in the form of innovation with the application of hijaiyah letters that have a development in aesthetic value and usability. The research method used is qualitative method in the form of literature study, observation, and interview of informant, then quantitative method of survey. The equipment of prayer becomes an educational media for the introduction of hijaiyah letters for children. By creating an inspired motif of the hijaiyah letter with playfull theme and application using surface design technique in the form of digital printing. Children's prayer equipment are made in a set of mukena, prayer rugs, cover iqra and prayer tool bag that aims to facilitate the child in the process of prayer. In this case the product is expected in addition to having a function as a equipment of prayer can also help children in knowing the letters hijaiyah through the media more interesting.
