

## ABSTRACT

*Department of communication and Informatics (DISKOMINFO) West Java province is a government agency engaged in the means of communication, Informatics, and public relations of the existing environment the Government of West Java. DISKOMINFO coupled with the Ministry of communications and Informatics (Kominfo), establishment of Diskominfo aims to support the implementation of the work programme of the Ministry of Kominfo in areas that existed in Indonesia including in the province of West Java. DISKOMINFO in West Java has a role as a Department that manages the information and communication technology systems and then channel it to the community. In addition DISKOMINFO has a duty that is coordinating and carrying out other tasks of the Governor in accordance with the respective task functions that exist in DISKOMINFO. To improve the performance of any function that is in the DISKOMINFO function in particular it governance, then it needs a mutual information system integrated. So in the development, designing strategic business needs and information technology in the form of Enterprise Architecture. The design of the enterprise architecture for information systems DISKOMINFO especially in the it governance functions use TOGAF ADM. TOGAF ADM itself has several phases such as: Preliminary Phase, the Architecture Vision, Business Architecture, Information System Architecture, Technology Architecture, Opportunities and Solutions, and Migration planning. As for the research output be IT roadmap that later can be used as a guide to align business strategies with technology between information in DISKOMINFO especially in the it governance functions.*
