ABSTRACT

The school is an institution or building that is used for teaching and learning activities as well as a place to give and receive lessons according to their level (elementary school, high school, and high school). Education is a conscious and planned effort to realize the learning atmosphere and the learning process for students to actively develop their potential to have religious spiritual strength, self-control, personality, intelligence, noble character, and the skills needed by themselves and society. The redesign of the interior of the Al-Azhar Kelapa Gading Islamic School aims to solve problems in terms of facilities and infrastructure at this school. Help create Islamic-based schools with adequate interior facilities.
