## ***Abstract***

*Indonesian Army Transportation Supply Training Center is one of military training center with its specialization in Army Transportation Supply which is one of administration unit. Average student age at Army Transportation Supply Training Center is 36 years old and above, in that age memory capacity and concentrate are on as good as when they are still young, another thing is layouting at their class which is not so good makes study atmosphere are comfortable less and also layouting at Markas Komando makes their staff working unefectively. Therefore it is necessary to redesign the Indonesian Army Transportation Supply Training Center with space conditioning atmosphere including layouting and all atmosphere element shaper with military soldier characteristic interior ambience, so all student and staff can do their work and study activity on maximum level. The Redesign the Indonesian Army Transportation Supply Training Center is expected to achieve results so optimally can bring a positive impact for all its users.*

*Key Plan : Indonesian Army Transportation Supply Training Center, Military, Redesign, Interior*
