

ABSTRACT

This research was conducted to determine and analyze the effect of teamwork on employee work productivity at PT. PLN (Persero) Transmisi Jawa Bagian Bandung.

This study uses a quantitative method with a type of causal descriptive research. The population in the study were 70 respondents using saturated sampling techniques. Data analysis techniques are descriptive analysis and simple linear regression analysis.

According to the descriptive analysis of teamwork variables and employee productivity variables included in the good category, there are several indicators that must be improved such as on time, coordinating, and conflict resolving. Based on the results of hypothesis testing, teamwork has a significant effect on employee work productivity. Teamwork is able to explain employee work productivity by 82,62% and the remaining 17,38% is influenced by other variables not examined in this study.

Keywords: Human Resources, Teamwork, Employee Work Productivity.
