

ABSTRACT

Grand Mosque of Bandung is a province mosque that located in Bandung, West Java. Since it has a status as province mosque, it provides with a lot of facilities such as deposit counter. Based on the existing product-analysis, site-observation, and interview with the visitors; i found several problems that need to be done-need for solution. As a designer i believe there's always a possibility to solve the problem in some creative way, then i made a product that could solve the problem-as a solution in Masjid Raya Bandung. The main idea of this research is located on Visual Aspect, but also this research following another aspect such as ergonomic, and system so it could be the solution for the problem.

Keywords : Visual Aspect, Storage Box, Grand Mosque of Bandung, Designing.
