

ABSTRACT

Bandung Tour On Bus or commonly called Bandros is a vehicle for sightseeing around the city of Bandung by bus. This bus from Bandung attracted many tourists both inside and outside the city even to government guests. The spacious space in the bandros bus is a convenience for tourists, so the reviewer team will redesign the structure of Bandros bus so that the interior space become wider in accordance with the aspects that are already owned by Bandros buss. With the qualitative method the team gets data such as inconvenience in the space of either the passenger or the bus driver, the technique is by conducting direct interviews in the field with the Bandros bus passengers and drivers. Therefore the reviewer team will change the shape of the bus structure in order to get a wider, more comfortable space and can be used for a long period of time.
