

ABSTRACT

The application of information systems especially in government agencies has been applied to financial management. The Government seeks to realize good service to government agencies by developing information technology in the financial sector in managing regional finance with the Regional Financial Management Information System (SIPKD).

This study aims to determine the success of the Regional Financial Management Information System (SIPKD) and its effect on system quality, service quality, and report quality at the West Java Provincial Health Office, along with eight Regional Technical Implementation Units (UPTD) below. This research uses system quality, service quality, and system quality as independent variables. While the success of the Regional Financial Management Information System (SIPKD) is used as a dependent variable. The sample used in this study was 43 SIPKD users. Quantitative analysis techniques and multiple linear analysis are used as data analysis.

The results of this study indicate that the quality of the quality report influences the success of the Regional Financial Management Information System (SIPKD). While the quality of the system and quality of service have no effect on the Regional Financial Management Information System (SIPKD).

Keywords: System Quality, Service Quality, Report Quality, The Succes of SIPKD.
