## **ABSTRAK**

Gambir railway station in Jakarta is serving station transport with the train fleet the travel among cities and do not serve commuter line. Redesigning area service and offices at a big station Gambir using themes Jakarta modern by presenting instant facilities and could support users by prioritising the concept of movement. The design also use the approach sustainable design that can affect Indonesia station behavior from users, so that it can be created behavior regular and neatly organized in accordance with its function and in order to of any facility given by station

This design also began with preparing the analysis result obtained either from the survey on site or online adapted to the standards and regulations. Then looking for the problem and resolved with the results of the application of the concept and an approach that in accordance with the existing problems that produces ultimate design.
