

## **ABSTRACT**

*Air transport companies as operators have the duty to provide optimal services to the public as users of air transportation services. Indonesia, which is an archipelagic country, reliable flight services is the main choice among the public, especially if the flight has affordable rates. Lion Group is the number 1 private airline in Indonesia, and the company that controls the Indonesian aviation sector. The office is also the second place after home for employees of the Lion Group company. Making employees feel comfortable working in the office is the main problem that must be solved by interior designers, not just thinking about the aspects where things are located and so on but making employees work effectively and comfortably. Interior design office made to clarify how the office, comfortable implementing the concept of corporate and brand identity, the office, fix adding and removing support facilities to meet the needs of users and the aviation. group supporting the lion This then will apply the concept design that puts forward function by regulating layout workspace according to the plan delineated jobdesk. organization to an enterprise and structure*
