

## *ABSTRACT*

Pontianak, located in West Borneo province is a city which has been undergoing improvement from many kind of aspects. The improvement starts from a development and education aspect. In education aspect, the government invites all the Pontianak's society to have a good way of thinking and the creativity. It purposed to make Pontianak city becoming a competence city and able to compete with the others city. But unfortunately, the plan does not run well because the public facility development in Pontianak does not move so fast like the others city and all the public facility development are not covered perfectly. On the other hands, it also caused by the chosen development, "government development and the little area development.

This phenomenon shows that Pontianak's societies need a facility or place that support them to get a better creativity knowledge and well way of thinking so that it can be used in social life. The facility can be improved and can be used for reaching a better knowledge and creativity is a good and comfortable public library in Pontianak. The parameter used in this phenomenon can be seen through the library which held by government. The library has a discomfort little area, unsupported facility, old book collections and the facilities that are not match with the standard.

Based on the issue and the phenomenon above, there should be a design development in creating or designing library. It purposed to creates a comfort reading room facility and education recreation that represents a standard of library. After the library has been stand just like the standard of Library, it will attracts Pontianak's society to come and improve theirs reading, knowledge and theirs way of thinking creatively so that the Pontianak's society always update with the newest informations and also to improve the facility in Pontianak City.
