**ABSTRACT:** Boarding schools are boarding schools. Over time more and more foundations have established Boarding Schools. Increasing the Boarding School itself is no longer heard, and the Boarding School itself becomes increasingly a trend for schools to be directed by students as well as students, so that the system offered is able to also support students in full days. In this final assignment the design taken is Islamic-based Islamic boarding school in Tasikmalaya. The author chose this boarding school design project only by taking a number of buildings which were assigned by high school, laboratory, mosque, male dormitory / i. The purpose of designing this final project is to answer questions that can be obtained from the results of a survey in which tasikmalaya is a city of santri, many institutions that form Islamic schools but do not pay attention to the standards and comfort of each space. Among them are ergonomic standards, Islamic understanding, also configuration with the surrounding environment. In answering this question, the theme imposed by the "Friendly Islamic School" with the concept of "Tropical Sundanese Design" are all viewed from several aspects. Based on location aspects, Institutional aspects, Islamic aspects. The application of the themes and concepts is one of which is easily obtained from local materials, the use of location vegetation that is able to configure the interior, as well as Islamic research that is taken from the Islamic values themselves in the schools at the Tasikmalaya Islamic Boarding School which are then applied at the design of the Tasikmalaya Islamic Boarding School.

**Keywords:** School, Islamic Boarding School, Tasikmalaya
