

## **ABSTRACT**

*With the increasing number of people in these big cities, of course it will have an impact on increasing levels of stress due to heavy activity and routines. This will certainly disrupt concentration in carrying out work activities and school activities. With this, Mon Reve is present as a treatment place to relax the body with herbal treatments that can calm the mind and provide a place of care for the family. However, based on observations, it is necessary to renew the interior space and Spa care facilities that are in accordance with the Day Spa treatment facilities, based on the standard PMK RI standard No. 8 of 2014 which has facilities such as hydro therapy, aroma therapy and massage therapy. This is because in this Spa place there is no area for families due to the limited available building land. While this Spa treatment place carries the name "Family". Therefore, the author will design a "Mon Reve Day Spa and Family Reflexology" by making an SPA intended for Personal, Couples and Family. With traditional Yogyakarta nuances that are able to provide a relaxed and comfortable feel for users who are in accordance with Mon Reve's own vision and mission. So that customers can enjoy a complete Day Spa treatment facility at Mon Reve Day Spa and Family Reflexology. The concept of Yogyakarta that I will apply is Contemporary Joglo, which refers to elements such as floors, walls and elements of material, color and ornament while still presenting a modern feel.*

**Keywords:** *Mon Reve, SPA, Yogyakarta*
