ABSTRACT

At SDN 02 Sukapura, students value processing has used the 2013 curriculum. Which is not only the value of knowledge that is included in the recording of student grades. There are values of attitudes, spiritual values, knowledge values, and skills values. In processing the value, SDN 02 Sukapura has used an application that is a number processing application. However, there are still shortcomings in using the number processing application. Data processed is still in the form of partial data. Therefore, the Student Value Recording Application is made. In making this application, the working method used is the Waterfall model. The programming language used is PHP, the framework used is CodeIgniter. The database used is MySQL. This application is tested using User Acceptance Testing so that this application can run properly.
