

ABSTRACT

Every institution or institution will always have a lot of data but sometimes its different presentation. Currently, the sub-district of Regol Mengger Cougar is one of the Kua which still uses the candidate data collection by means of manually collecting files that will then be sent to the Ministry of religious or paper file. At the moment the data management of prospective married couples has been using computerised system, but the utilization is still limited in data management such as Microsoft Excel. In the KUA region still do the filing manually.
