

## ABSTRACT

Commuter Line is one of the most widely used modes of public transportation by the people of Jakarta and surrounding areas. Commuter line was chosen because of the timeliness, fast travel time, relatively cheap prices and has many supporting facilities, which are in accordance with the mission of PT.KAI and PT.KCI which is about providing commuter rail transport services that prioritize, safety, service, comfort and timeliness and environmental insight. And to realize that mission is to improve facilities and infrastructure, one of which is the station. Duri Station is one of the busiest stations in JABODETABEK. The duri station has the status as a large type C station, the duri station is a transit station that connects passengers from Jakarta, Bekasi and Bogor to Tangerang and vice versa, and also as one of the stations for the Airport Train (Railink). The function of the station as a place to wait and transit passengers has another function to be a place to socialize between passengers requires supporting facilities to interact. it is necessary to redesign the Duri Station to provide public facilities that make visitors feel comfortable and safe in accordance with applicable standards and rules. And can improve the layout of the space so that the creation of a clean station environment, and is able to overcome the circulation of visitors who are busy and can continue to grow each year.
