ABSTRACT

Application for Ordering and Managing Stock of Fabric Machinery Parts at CV Maemunah is an application that is used to make it easier for officers to store spare parts inventory in warehouses, order and use of spare parts. Managing warehouse reserves for machines is important to know the amount of reserves available and to know the amount of incoming and outgoing reserves in the warehouse. The system to be built is a web-based application that uses PHP, HTML, CSS as a programming language and MySQL for the database. For system development using the waterfall method with the stages of forming Software Requirements Analysis, Design, Coding, and Testing. With the construction of the Ordering and Management Application for Cloth Machine Spare Parts at CV Maemunah, it is expected that CV Maemunah can place orders, and manage data on the application.
