## **ABSTRACT**

The company's profit growth will be good if the company has good finance, which in turn will increase the value of the company. Profit growth is also the performance of a company, the higher the profit achieved by a company, the better the company's performance proves.

This study aims to determine the effect of financial ratios consisting of Company Size, Current Ratio, Debt to Equity Ratio, and Total Assets Turnover on Profit Growth in Property, Real estate and Building Construction Service Sector Companies Listed on the Indonesia Stock Exchange in 2015-2018.

The population in this study is the Property Sector, Real estate and Building Construction Services Companies Listed on the Indonesia Stock Exchange in 2015-2018. The sampling technique in this study was purposive sampling and selected thirteen companies as samples with a four-year study to obtain 52 samples. The analysis technique used in this study is panel data regression analysis using the EViews 10 Version application.

Based on the results of research on Company Size, Current Ratio, Debt to Equity Ratio, and Total Assets Turnover simultaneously have a significant effect on Profit Growth. Partially, the variable Company Size and Total Assets Turnover has a significant positive effect on Earnings Growth, while Current Ratio and Debt to Equity Ratio have no significant effect on Profit Growth.

For investors to be more careful in making investment decisions by looking at the company's profit growth. It is recommended for companies to have good profit growth conditions. One way is to increase the value of the Ukuruan Company and Total Assets Turnover.

**Keywords:** Current Ratio, Debt to Equity Ratio, Total Assets Turnover, Company Size, Profit Growth
