Batik Kembang Turi is a typical batik motif owned by Kampung Batik Kembang Turi in Blitar City. The Blitar Government inaugurated this batik village on October 8, 2018. In addition to Kembang Turi, The Batik Village Kembang Turi also has another distinctive motif in the form of Koi Fish and has distinctive colors red and green as well. But unfortunately, the patterns and stylations of the motifs are fairly simple and require innovation, the composition of motifs in The Kampung Batik Kembang Turi uses a one-step monotone motif processing and does not have a color concept yet that can represent the characteristics of batik motifs from the Village of Batik Kembang Turi.

This research was conducted by conducting a literature study on batik literature, direct observation to Kampung Batik Kembang Turi Village by doing interviews with the Chairperson, Secretary and President of Batik Association in Blitar.

From the results of this determination, produced several innovations in terms of stylation, patterns, composition of one-step reflection symmetry, and color concepts split complements. These are new innovations for the Batik Kembang Turi Village make aesthetic values and characteristics for Batik Kembang Turi.

Keywords: Batik Kembang Turi, Kampung Batik Kembang Turi, Reflection Symmetry.
