Abstract

Dompet Peduli Umat Daarut Tauhid is an organisation of Amil Ziswa that gathering donation and to make an efficient the donation. This organisation has vision tu make an organisation that good entrusted to, professional, acuntable, and leading with spread operation region, and a mission that optimizing people potency along ZISWA to efficient people in economy, education, *dakwah* dan social. To fulfil the vision, it is needed the organizing their data. And also media to lead the information quickly.

So, is used a web based application to help those process.web based is choosen to make easier the data transformation between DPU branches. This management application system is a development from the application that as been used by DPU-DT. It is hoped that with developing this existing system then the lack of the existing system can be replaced then process' in DPU-DT can progress more fast.

This application is built by using PHP with using existing system as development base. And the choosen database application to build the database is MySQL.

Keywords : *web based application, development, donation.*
