

ABSTRACT

PPDU (Program Perkuliahan Dasar dan Umum) is an agency of Telkom University which manages basic and general lectures. PPDU also coordinates the several laboratories. Those are the Basic Physics Lab and Basic Computer Lab. With a large number of assistants in each lab, it cause a lot of problems in management. For the example is the difficulty of the submission assistant's salary. This is happened because of the management in PPDU still use the manual system. This condition is also occurred in process of making practicum report / BAP (Berita Acara Praktikum) for each those laboratory.

To overcome these problems, in this final project will be made an application based on the website to arrange the salary payment of the PPDU Assistant of Telkom University. This application has a few features. The application can handle the creation of BAP files, the assistant presence creation and the exportation of BAP. To run these features, the assistant simply input the practicum-keeping schedule.

Based on the subjective test results, obtained a score is 4.19. So, based on that, the performance of the website expressed well. So, it can be said thath the existence of the website, the submission of salary Asisstant becomes easier.
