

Abstract

Music is an element that cannot be separated from humanity. Music evolves with the development of society. As a result, music diverges into many different genres, influenced by the social situation of its people. Music and lifestyle is interdependent with each other, and each serves as the child of the developing popular culture. One of the popular cultures that has entered Indonesia is *Psychedelic*. This pop culture introduces psychedelic music in large Indonesian cities, such as Bandung. The lack of information about the development of psychedelic music especially in Bandung makes the majority of the people unknown to its history. Eventually, there is a need to recap and design a media of information about the development of psychedelic music in the city of Bandung. This Research are used several method, qualitative data method, AIO method for find out the characteristic from the audience, and analysis SWOT method to find out excess and lack from the media who being designed. The information being designed is in the form of an interactive book, and its audience being the adolescents of Bandung. History is an important field of study because we live in the present, and our history is a lesson for our future.
