

## ABSTRACT

The development of offices are currently very rapid. Office developments can be seen from that initially only be used for the working place, which is identical to the formal rules. Currently the office evolved into more flexible and more relaxed, without leave any rules that make offices as a place to work.

Airbus military is one of the largest aircraft manufacturer in the world, who want to make aircraft assembly offices in Indonesia, as an assembly hub for Asia. Airbus Military itself will conduct cooperation in aircraft assembling with PT Dirgantara Indonesia, as the location owner of of the assembly in Indonesia. Airbus Military will use FTC / ACS bulding as an office and a place of assembling.

FTC / ACS building can be said to be improperly used as an office, because since 1998 the building was not used anymore. Interior design of FTC / ACS building is expected to give the impression of a representative or give the impression that can represent corporate identity.

The theme that is expecting to appear in this Airbus Military office is futuristic in Harmony, with a futuristic concept. The theme and the concept was taken from the company's slogan which is *pioneering the future togetherness*, which pioneered the future together. The room that will be highlighted on Airbus Military's office is the lobby, cafeteria, mechanical areas, manager space, general manager of space, Airbus staff room, toilets, meeting rooms, and space cooperation between Airbus Military and PT. Dirgantara Indonesia, which is key element in an office.

Keywords: design, interior, office, Airbus Military aircraft, futuristic, Indonesia
