

INTERIOR PLANNING
RATTAN INNOVATION CENTER OF INDONESIA (PIRNas)
(RATTAN LAMINATE MATERIAL EXPLORATION AS INTERIOR
ELEMENTS)

Abstract

More than 80 % of rattan raw materials of world's needs is produced by Indonesia. The presence of the Rattan Innovation Center of Indonesia (PIRNas) since 2012 gives a positive impact on the development of Indonesian rattan, where PIRNas directly contribute under the Ministry of Industry. But the interior of PIRNas existing condition that has not been designed is an important part that must be solved by PIRNas. PIRNas not only as rattan latest innovations producer but also serves to maintain and develop the scheme and rattan industry of Indonesia. There is a scheme rattan industry that divided into three segments, that are upstream, downstream and surface, there is the role of different skills but one vision on it. This thing gives a basic idea of an interior design concept by adopting a system of this 3 segmentations scheme. From the above background, the author will design the interior of PIRNas with the concept, "Rattan Athmosphere of Indonesia".
