LIST OF TABLES

Table II. 1 Advantage and disadvantage of (*R, Q*) system 15
Table II. 2 Advantage and disadvantage of (s, S) system 16
Table II. 3 Research comparison 18
Table IV. 1 Demand data in retailer Bali 26
Table IV. 2 Demand data in retailer Jember 26
Table IV. 3 Demand data in retailer Lombok 27
Table IV. 4 Demand data in retailer Malang 27
Table IV. 5 Demand data in retailer Sampit 27
Table IV. 6 Demand data in retailer Surabaya 28
Table IV. 7 Lead time data 29
Table IV. 8 Unit price data 29
Table IV. 9 Labor cost at retailer Bali 30
Table IV. 10 Labor cost at retailer Jember 30
Table IV. 11 Labor cost at retailer Lombok 31
Table IV. 12 Labor cost at retailer Sampit 31
Table IV. 13 Labor cost at retailer Surabaya 31
Table IV. 14 Building cost of retailer 32
Table IV. 15 Building cost of DC Surabaya 32
Table IV. 16 Facility cost at retailer Bali 33
Table IV. 17 Facility cost at retailer Jember 33
Table IV. 18 Facility cost at retailer Lombok 33
Table IV. 19 Facility cost at retailer Sampit 34
Table IV. 20 Facility cost at DC Surabaya 34
Table IV. 21 Electricity cost 35
Table IV. 22 Holding cost 36
Table IV. 23 Order cost 37
Table IV. 24 Shortage cost 39
Table IV. 25 Variable code of demand 40
Table IV. 26 Result of demand distribution test 49
Table IV. 27 Sample calculation for *Q*-problem (retailer 2) 56

Table IV. 28 Sample calculation for *Q*-problem (retailer 3)..... 57
Table IV. 29 Sample calculation for *Q*-problem (retailer 4)..... 57
Table IV. 30 Sample calculation for *Q*-problem (retailer 5)..... 58
Table IV. 31 Sample calculation for *Q*-problem (retailer 6)..... 59
Table IV. 32 Sample calculation for *Q*-problem (DC Surabaya)..... 59
Table IV. 33 Sample calculation of cost of stock 2 60
Table IV. 34 Sample calculation of cost of stock 3 61
Table IV. 35 Minimum cost of stock i (given $QN = 1$ at iteration 1) 62
Table IV. 36 Result of dynamic programming algorithm for *Q*-problem (SKU '01987) 62
Table IV. 37 Result of dynamic programming algorithm for *Q*-problem (SKU '01986) 63
Table IV. 38 Result of dynamic programming algorithm for *Q*-problem (SKU '01999) 63
Table IV. 39 Result of dynamic programming algorithm for *Q*-problem (SKU '01990) 63
Table IV. 40 Result of dynamic programming algorithm for *Q*-problem (SKU '01991) 64
Table IV. 41 Result of dynamic programming algorithm for *Q*-problem (SKU '01996) 64
Table IV. 42 Result of dynamic programming algorithm for *Q*-problem (SKU '01998) 64
Table IV. 43 Result of dynamic programming algorithm for *Q*-problem (SKU '00875) 65
Table IV. 44 Calculation of maximum reasonable lead time demand levels at retailer Bali for SKU '01987 66
Table IV. 45 Summary result of $Di\tau$ for SKU '01987 67
Table IV. 46 Result of (R_i, Q_i) values of each stock i (SKU '01987) 69
Table IV. 47 Calculation of fill rate 69
Table IV. 48 Actual holding cost per month 70
Table IV. 49 Calculation of actual order cost per 11 months 71
Table IV. 50 Total actual order cost per month 72

Table IV. 51 Actual shortage cost per month 73
Table IV. 52 Actual echelon inventory cost..... 73
Table IV. 53 Holding cost of proposed condition..... 74
Table IV. 54 Total holding cost of proposed condition 74
Table IV. 55 Ordering cost of proposed condition 75
Table IV. 56 Total ordering cost of proposed condition..... 76
Table IV. 57 Shortage cost of improvement condition..... 77
Table IV. 58 Total shortage cost of proposed condition..... 77
Table IV. 59 Echelon inventory cost of proposed condition 78
Table V. 1 Sensitivity of demand..... 82
Table V. 2 Sensitivity of ordering cost 83
Table V. 3 Sensitivity of holding cost..... 84
Table V. 4 Sensitivity of shortage cost 85
Table V. 5 Comparison of total holding cost per SKU..... 87
Table V. 6 Comparison of total ordering cost per SKU..... 88
Table V. 7 Comparison of total shortage cost per SKU..... 90
Table V. 8 Comparison of total echelon inventory cost..... 91
Table V. 9 Comparison of Fill Rate..... 92
Table VI. 1 Result of optimal parameter order quantity..... 94
Table VI. 2 Result of optimal parameter reorder point..... 94
