ABSTRACT

Ablution is a mandatory requirement and a legitimate requirement before praying. Ablutions method is already been taught to use since we were childhood, wheter at home or at school. The example of Islamic School in Bandung that teaches the way to do ablutioning at Islamic Education subject is SD Ar-Rafi', but only for second graders. The teachers are using learing method by explaining and practicing the lessons, and then the final test. This desktop technology application of ablution study based multimedia was made to help teachers and also students. The study materials in this application are equipped by a guidebook. The purpose of this application is to increasing user's interest and to make them to not get bored easily when studying, this application can also helps the students learning process especially albutioning. The making process of this application was by using the ADDIE method, that consist of 5 stages: Analyze, Design, Develop, Implement, and Evaluate. This application was made by using Microsoft OS Windows 10 Pro 64-bit, CorelDraw, Adobe Flash, Action Script, dan Adobe Audition software. This application can be test by using test functionally and UAT (User Acceptance Test). The product of this application can be used as learning application for teacher and student to learn about ablution. The conclutions from this final project is the successes of making application of ablution study based multimedia for second grade primary school that can be used by teachers and students aswell, the successes of increasing student's studying interest, and also the successes of making an evaluation that help students to do ablution steps correctly.

Keywords: Ablution, Ar-Rafi', Multimedia, ADDIE.
