Sexual education for children is an important component that should be given to the children from an early age so that they can avoid from the negative effect that can be inflicted from sexual acts and also they can have an adequate knowledge about the importance of keeping their reproduction organs, also instill the moral values that related with a sexual problems in accordance of a norms that applied in society like what is forbidden, what is allowed and how to do it. But, in practice, sexual education it is still very taboo to be delivered to children. The lack of parental knowledge and the educational institution for children in providing information about sexual makes the children has a curious feels that make them find the information from many information sources, such as internet or from the wrong sources and without parental guidance, so the information that they get can become a boomerang for children itself. Based from those phenomena, media design as a book is needed that can help explained sexual education to the children which is under the supervision of parents or the educational institution that concerned with children's education at an early ages. The sex education materials for children in form of introduction the bodies part of children, toilet training and bed places separation and also the preventive action in order to avoid bad people and its crime. With an catchy illustration modeling and with the sentences that suitable and appropriate for children. This media design book can be hold through the data collection process in observation, interview and literature review. The media design book of sexual education for children's is expected to help parents, the childrens, and various relevant instances in case of giving information about sexual education also be expected can reduce the negative effect and explaining the preventive action against sexual aberrations that afflicted the childrens.
