ABSTRACT

Adults working to make ends meet, will reach they age limit to quit his job. The period is called retirement. One of the changes that occur in the pensioner is on their communication. Age can lead to some changes in humans. There are several pensioner associations on state-owned enterprises in Indonesia, one of the association is Association of Retired Pertamina (Himpana). In Himpana Bandung, in their communications on the many side insert their typical humor or jokes. The purpose of this study was to determine the pattern and communications functions of humor in the form of verbal and nonverbal in Himpana Bandung. Qualitative research methods used with ethnographic approach and using the Theory of Symbolic Interactionism. Based on the results of this research can be known how the humor communication and functions on Himpana Bandung pensioners, whether in the form of Verbal and Nonverbal the authors explain descriptively.
