ABSTRACT

Praying is an obligation that must be implemented by every Muslim every day for prayer is the pillar of religion for Muslims. Mosque for Muslims is an absolute necessity that there should be, because the mosque works to increase the quality of life and the people that are useful as the central place of worship. When someone traveling a lot and that area may not be covered by the call to prayer from the mosque then one can not follow the prayers in a timely manner. Therefore, it needs the means of information that can help to remind the call to prayer and know where the location of the mosque. Final Project is to support these issues, will be made an application designed to help people get information and mosque call to prayer. Applications are made is based on Android and Web applications CI PHP using MySQL as its database.

Keywords: Prayer, Mosque, Android, PHP, MySQL.
