Abstract iv
Dedication v
Preface vi
Table of Contents vii
List of Figure viii
List of Abbreviations ix
List of Symbols x
List of Table xii
Appendix List xiii
1. Chapter I Introduction 1
    1.1 Background 1
    1.2 Problem Definition 2
    1.3 Research Objective 2
    1.4 Hypothesis 2
    1.5 Scope of works 3
    1.6 Description of Methods 3
2. Chapter II Reference Tracing 5
    2.1 Differential Modulation 5
    2.2 MC-CDMA 9
3. Chapter III System Design 12
    3.1 Overview 12
    3.2 Research Methodology 13
    3.3 Transmitter Design 15
    3.4 Receiver Design 18
    3.5 Receiver Design for 2x1 MISO DUSTFM 21
    3.6 Transmitter Design for 4x4 MIMO DUSTFM 22
    3.7 Receiver Design for 4x4 MIMO DUSTFM 22
    3.8 Experimental Design 26
4. Simulation Result and Analysis 30
    4.1 Experiment 1 result: Capacity Analysis 30
    4.2 Experiment 2 result: Proposed system performance in AWGN 31
    4.3 Experiment 3 result: Proposed system performance in Rayleigh 32
    4.4 Experiment 4 result: Proposed system against Conventional Differential Modulation 33
    4.5 Experiment 5 result: MC-CDMA against OFDM performance 34
    4.6 Experiment 6 result: Proposed system in Different User Velocities 35
    4.7 Experiment 7 result: Proposed system with channel coding 36
    4.8 Experiment 8 result: DUSTFM for 4x4 MIMO performance 37
5. Conclusion and Recommendation 40
    5.1 Conclusion 40
    5.2 Recommendation 41
Reference 42
Appendix 44
