

## LIST OF TABLES

Table 3. 1 Total Flow of Level-1 Network .....	18
Table 3. 2 Total new packet-in (Flow per second) and minimum numbers of controller needed.....	19
Table 3. 3 Backbone Metro Ethernet Regional Jatim, sort by Packet Flow at descending order .....	20
Table 3. 4 Controller Level-1 candidates.....	21
Table 3. 5 Traditional network existing boundaries and nodes with the hisghest load.....	22
Table 4. 1 POCO Framework Output, Level-1, $k = 1$ .....	37
Table 4. 2 Controller imbalance and latency calculation.....	38
Table 4. 3 Average Node to Controller latency and Flow delay calculation .....	39
Table 4. 4 POCO Framework Output, Level-1 Controller, Resiliency aspect.....	39
Table 4. 5 Latency and controller load for Level-1 Controller .....	40
Table 4. 6 Average flow-latency for Level-1 Controller, Resiliency aspect. ....	441
Table 4. 7 Controller load & Latency at Resiliency scenario Analysis. ....	444
Table 4. 8 POCO output for Level-2 network, $k = 2$ .....	44
Table 4. 9 Latency and controller imbalance for Level-2 network, $k = 2$ . ....	484
Table 4. 10 Average node to controller and Packet delay for Level-2 network, $k = 2$ .. ....	486
Table 4. 11 POCO output for Level-2 network, $k = 3$ . ....	487
Table 4. 12 Latency and controller imbalance for Level-2 network, $k = 3$ .....	488
Table 4. 13 Latency and Flow delay for Level-2 network, $k = 3$ .....	489
Table 4. 14 Load of the controller and latency for Resilient network scenario, Level-2. ....	54
Table 4. 15 Latency and controller imbalance for Level-2 network, $k = 2$ .....	55
