

## **ABSTRACT**

*Weaponry System is the main component in military beside active personnels. As one of weaponry produsen in this country, for a long time Pindad already participated in the defence and security effort through weaponry product industry such as gun, ammunition and vehicle. Based on observation, interview, documentation and literature study during the designing procces, Pindad need a representative and informative showroom facility to show off many kinds of Pindad weaponry product. Interior design of showroom facility is realized through display system and museum circulation that capable for guaranteeing the safety of collection, people, building and surrounding environment. In addition for supporting the information needs, Pindad Weaponry Museum Planning also aims to introduce Pindad weaponry innovations, technology and achievements to increase marketability of all Pindad weaponry products.*
