

REDESIGN INTERIOR CO-WORKING SPACE BANDUNG TECHNO PARK IN BANDUNG

Abstract

Currently the development of startup business in Indonesia is growing rapidly and dynamis. This makes the establishment of Co - Working Space as a place to accommodate business startup. Along with the rapid growth of startups in Indonesia is directly proportional to the founding Co - Working Space as the place to work startups, so that co - working space is becoming popular in the business world in Indonesia. Co - Working Space is an innovation in the world of work , which is a place to work , collaborate , and interact socially more varied with a minimal budget , in contrast to traditional office which requires investing in property as well as the working environment homogeneous. Bandung Techno Park is an institution where develop research in the fields of technology , recently made a Co - Working Space with the aim to contribute to the development of techno Indonesia startup. From these reasons the author will redesign the interior Co - Working Space Bandung Techno Park with the theme " Initiation of Technology " , which aims to redesign the interior of Co - Working Space Bandung Techno Park based place to develop and facilitate startup techno and displays the identity of the company on the design on demand of Bandung Techno Park .
